

**AMENDMENTS TO THE CLAIMS**

This listing of claims will replace all prior versions, and listings, of claims in the application.

**Listing of Claims:**

1. (Currently Amended) A mobile telecommunications device including a browser ~~to navigate~~ for navigating between different pages and display information therefrom, and a key operable in a first mode to navigate between previously visited pages and operable in a second mode to provide a display of previously visited pages whereby to permit the user to select a page from the display of previously visited pages and navigate directly thereto.

2. (Original) A device according to claim 1 wherein the key is operable to navigate backwards through previously visited pages.

3. (Original) A device according to claim 1 wherein the key is operable to navigate forwardly through previously visited pages.

4. (Currently Amended) A device according to claim 1 wherein the first and second modes are selected by operating the key for relatively ~~short~~ shorter and long longer periods respectively.

5. (Currently Amended) A device according to claim 1 including a scrolling key operable to scroll a focus region through the display of previously visited ~~homepages- pages~~ for selecting one of them the pages.

6. (Currently Amended) A device according to claim 1 including a further key for selecting a ~~homepage- page~~ from the previously visited ~~homepage- pages~~ display and so as to navigate directly thereto.

7. (Original) A device according to claim 1 and comprising a mobile telephone handset.

8. (Original) A device according to claim 1 and comprising a PDA.

9. (Currently Amended) A device according to claim 1 wherein the display of the previously visited pages comprises a display of the previously visited home pages whereby to permit the user to select one of them the previously visited pages and navigate directly thereto.

10. (Currently Amended) A memory that stores a program to be run by a processor to provide a browser functionality to permit a user to navigate between different network addresses and display information therefrom, and the browser being responsive to inputs from a key operable by the user in a first mode to navigate successively between previously visited network addresses and responsive to operation of the key in a second mode to provide data corresponding to a display

of previously visited homepages whereby to permit the user to select a homepage from the previously visited ~~homepage~~ homepages display and navigate directly thereto.

11. (Original) A device according to claim 1, which is WAP enabled.

12. (Currently Amended) A method of operating a browser in a mobile telecommunications device, including operating a key of the device in a first mode to navigate between previously visited pages, operating the key in a second mode to provide a display of previously visited pages and selecting one of the pages from the display of previously visited pages to ~~as to~~ navigate directly thereto.

13. (Currently Amended) A mobile telecommunications device including a browser to navigate between different network addresses and display information therefrom, and a key operable in a first mode to navigate between previously visited network addresses and operable in a second mode to provide a display of previously visited homepages whereby to permit the user to select a homepage from the previously visited ~~homepage~~ homepages display and navigate directly thereto.

14. (Original) A device according to claim 13 including a key to scroll a focus region between suitable menu options displayed on the browser, to permit navigation between different network addresses.
